Reasons For Allowance

Claims 5 – 14 are allowable.

1. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims the prior arts made of record fail to suggest a binary encoder, comprising: a third transistor coupled between the first output and a reference potential, and a fourth transistor coupled between the second output and the reference potential; and the first and second pair of parallel-coupled transistors each having an input terminal, and the third and fourth transistors each having an input terminal, the first output coupled to a first input of the second pair of parallel-coupled transistors, the second output coupled to a first input of the second pair of parallel-coupled transistors. Also, in combination with other limitations of the claims the prior arts made of record fail to suggest a binary decoder for integrated circuits, comprising: a second set of parallel-coupled transistors coupled between the voltage source and a second output, the second set of parallel-coupled transistors comprising fourth, fifth, and sixth transistors, each having respective inputs; a seventh transistor coupled between the first output and a common node and having an input, an eighth transistor coupled between the second output and the common node and having an input, and a ninth transistor coupled between the common node and a voltage reference and having an input.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
